**ENDANGERED SPECIES COMPLIANCE**

The location of the treatment areas must be submitted to the Illinois Department of Natural Resources (IDNR) EcoCAT website to determine if protected natural resources are in the vicinity, [www.dnrecocat.state.il.us/ecopublic](http://www.dnrecocat.state.il.us/ecopublic). Consultation with the department is required under the Illinois Endangered Species Protection Act, 520 ILCS 10/11(b) and the Illinois Natural Areas Preservation Act, 525 ILCS 30/17, for all permittees covered by this permit unless exempted below.

The following applications are exempt from consultation unless there will be an adverse impact to a listed species or its essential habitat or to a Natural Area:

- Per consultation regulations (17 Ill. Adm. Code, Part 1075) – annual, routine cultivation of existing agricultural lands; and maintenance of existing lawns, yards and ornamental plantings.
- Per a Memorandum of Understanding between IEPA and IDNR – microbial larvicide applied to catch basins and storm sewers.

Have the treatment areas been submitted to the Illinois Department of Natural Resources to satisfy applicable requirement for compliance with Illinois law on endangered species?

- Yes    No    Not Applicable (Application is an exempt activity)

**WATER QUANTITY IMPAIRED WATERS**

Operators are not eligible under this permit for any discharges from a pesticide application to waters of the State if the waters are identified as impaired by a substance which is either an active ingredient in the pesticide designated for use or is a degradate of such an active ingredient. See Part 1.1.2.1 of the Permit.

Check One

- Waters are NOT impaired by any substance which is either an active ingredient in the pesticide to be discharged or a degradate of such an active ingredient.  
 Waters are on a current state list as being impaired by a substance which is either an active ingredient in the pesticide to be discharged or a degradate of such an active ingredient; however, evidence is attached documenting that the waters are no longer impaired.

**CERTIFICATION**

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. On the basis of my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations. I certify that the provisions of the permit will be complied with.

NOIs must be typed or printed legibly and signed. Original signature must be submitted to the Agency.

Any operator who is not presently covered by the General NPDES Permit for Pesticide Application Point Source Discharges is considered a new operator.

If this is a change in your application information or renewal, etc., please fill in your NPDES permit number on the appropriate line. When selecting a change in information, fill out all of the fields on the NOI that need to be modified. Changes of information or permit renewal notifications do not require an application fee.

Note: If the operator mailing address is not where the permit records will be located, the application should note where records will be located.

For all pesticide application use patterns checked on page 1, please fill out a separate page 2 for each pesticide application use pattern.

Documentation is not required to be submitted for Endangered Species Compliance. These records should be kept in accordance with Section 7.1 of the permit.

Instructions on how to use EcoCAT are located on the home page of the IDNR website. You should submit a treatment area location at least 30 days before pesticide application. If no protected resources are in the vicinity, EcoCAT will terminate the consultation immediately. If resources are identified by EcoCAT, IDNR staff will review the location and either terminate consultation as unlikely to have an adverse impact, or recommend measures to avoid or minimize potential adverse impact. Note: In the project description entered into EcoCAT, include the type of pesticide being used and the method of application.

An EcoCAT report that terminates consultation for this project or a letter from IDNR that terminates consultation for this project must be available upon request. If protective measures for listed species or natural areas are recommended by IDNR, documentation that you have incorporated those measures into your treatment process should also be available upon request.

Currently there is no annual fee associated with this NPDES permit. If at a later date an annual fee is instituted, submission of the initial fee is required prior to the Notice of Intent being considered complete for coverage by the ILG87 General Permit. Please make checks payable to: Illinois EPA at the address above.

For the first year of the permit, the PDMP must be submitted 90-days after coverage under the General Permit. After October 31, 2012, the PDMP must be submitted with the NOI for the application to be considered complete for coverage under the General Permit. The PDMP should be submitted electronically to: [epa.ILG87pestpdmp@illinois.gov](mailto:epa.ILG87pestpdmp@illinois.gov). The PDMP must be submitted in a PDF format.
